Career Opportunities

What can we help you find today?

[News & Events](#)

We are always looking for highly motivated, talented, and enthusiastic people with an interest in basis of cancer and development. Currently, we have

Research Fellow

We are always looking for talented and enthusiastic postdocs to join our group. Candidates are encouraged to propose novel lines of investigation, as long as they are bold, exciting, and somewhat feasible!

If you are interested, please send a cover letter, a CV (including list of publications), contact information of three referees, and a brief email to venturaa@mskcc.org

Graduate Student

Our lab welcomes highly motivated, curious graduate students from the Weill Cornell Graduate School, Gerstner Sloan Kettering Graduate School of Biomedical Sciences, Tri-Institutional Computational Biology & Medicine Program, or Tri-Institutional MD/PhD Program.

A variety of projects on cancer genetics, high-throughput CRISPR screening, non-coding RNAs, and mouse modeling via conventional gene targeting or somatic genome editing are available. Please contact venturaa@mskcc.org to discuss about rotating in the lab.

Research Technician

Our laboratory is recruiting a research technician interested in applying cutting edge molecular biology techniques to study cancer and or non-coding RNAs. We are always open in mentoring candidates who aim to pursue graduate school or MD/PhD training afterwards. Experience in molecular biology research or mouse work is preferred but not required.

Clinical Fellows

Clinical fellows are welcome to join our group with preference given to current MSKCC Hospital Fellows with prior research experience.

If you are interested, please reach out directly to venturaa@mskcc.org with a CV and contact information for two letters of reference.
