[Cancer Biology](#) **Housing & Cost of Living**

[Cancer Engineering](#)

Students who matriculate in GSK are offered affordable housing owned by MSK. Students who join GSK in 2025 will be offered shared apartments. The cost of housing is very competitive for this area.

[Research](#)

The occupancy agreement should be read carefully because it is a contract between MSK and the student. The housing contract is in effect for the duration of study and is automatically renewed each year. If a student wishes to vacate MSK housing before completion of the program, the student must abide by the vacate policy of the Housing Division.

[Alumni](#)

Students who are finishing their degrees must comply with the GSK sign-out process, which includes a 30-day notice for termination of the occupancy agreement with MSK.
